

R66 Block Accessories Covers and Clips

Hinged Covers

Plastic Hinged Covers

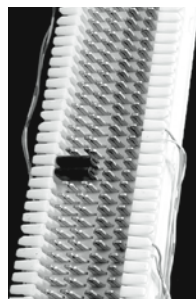

Plastic hinged covers (R66MHC__) are made for the R66 M series quick-clip terminal blocks, but may also be used on any quick-clip block with a 3.39 inch width (R66MOD, RJ21MOD, R700, or R66M connectorized series). They are available in 10-inch lengths. Color-coding identifies block function at a glance. The standard colors are orange and gray.

The cover attaches along the fanning strip, securely anchoring it to the block. The cover has a flexible hinge that won't wear out, tear or separate. It also features an erasable write-on surface for making pair identification simple and easy using either a pen or a pencil.

Ordering Information

Catalog No.	Part No.	Description
R66MHCO	F015376	Hinged cover for M series blocks, orange plastic, 10" length
R66MHCG	F015377	Hinged cover for M series blocks, gray plastic, 10" length

Note: All covers are UL Listed.

Bridging Clips

RA1 Series Bridging Clips

RA1 series stainless steel bridging clips connect adjacent quick-clips on R66 blocks, providing access points for isolating and testing incoming pairs from outgoing pairs. Available in 2, 3 or 4-position configurations, they are reusable and can be easily removed for wiring.

Ordering Information

Catalog No.	Part No.	Description	Pkg. Qty.
RA1	F005170	2-terminal bridging clip	100

Insulator Clips

Insulator clips mechanically protect wire terminations on R66 blocks. They are available in 2, 3 or 6-terminal clip configurations. Terminal clip insulators are manufactured from red PVC material. Insulator clips mechanically protect wire terminations on R66 blocks.
